Bain Capital's History in the UK

Since its founding in 1984 in Boston, Bain Capital has grown and evolved into one of the leading global private investment firms in the world. Many of our Managing Directors and team members have worked as strategic consultants advising a large number of companies across a wide range of industries. From this heritage, Bain Capital has built upon the experience and ability of its professionals to assess a company's potential, develop powerful strategies, and implement fundamental change in partnership with great management teams. Bain Capital Private Equity now has eleven offices on four continents and has raised 13 global private equity funds, five European funds and four Asian funds.

In August 2005, Bain Capital Credit established a presence in London. Bain Capital Credit's European team now consists of 61 investment professionals and has a successful track record of investing in Europe, managing €6.4 B across European bank loans and high yield bonds as of March 31, 2021. In addition to mezzanine investments, the team has invested approximately €6.4 B of equity across more than 65 non-performing loans, non-core assets, special situations real estate, and traded investments for a total GBV / REV of nearly €19 B (as of March 31, 2021).

Bain Capital Private Equity's European investment team is based in London and Munich, and operates within the globally integrated team. Since establishing a dedicated Europe office in London in 2000, the firm has raised five Europe-focused funds and has invested in companies across a broad range of industry sectors and countries.

In October 2001, Bain Capital Fund VII-E, L.P. ("Fund VII-E") was organized as the primary vehicle for making European private equity investments, with \$500 million in commitments. While Fund VII-E's primary focus was to invest in attractive European mid-market companies, it also maintained the flexibility to opportunistically pursue select larger European investments by sharing these investment opportunities with Bain Capital's global private equity funds. This investment sharing structure enabled Fund VII-E to invest in a range of transaction sizes, without becoming overly concentrated in a small number of very large investments and without the pressure of investing a fund that Bain Capital felt was too large.

In August 2004, Bain Capital Fund VIII-E, L.P. ("Fund VIII-E") was organized as a successor fund to Fund VII-E, with €1.015 billion in commitments. Like Fund VII-E, Fund VIII-E focused its investment activities in mid-market European companies while opportunistically investing in attractive larger transactions alongside Bain Capital's global private equity funds. It also expanded its investment focus to include two investments in South Africa.

In March 2008, Bain Capital Europe Fund III, L.P. was organized as the successor fund to Fund VIII-E, with €3.5 billion in commitments. It pursued a similar strategy to Fund VIII-E.

In November 2014, Bain Capital Fund Europe IV, L.P. was organized as the successor fund to Europe Fund III, with €3.5 billion in commitments. Europe IV continued to focus on companies headquartered in Europe, typically with international operations or aspirations, where Bain Capital has significant comparative advantage over other potential bidders.

In June 2018, Bain Capital Fund Europe V, L.P. was organized as the successor fund to Europe Fund IV, with €4.35 billion in external commitments.

Bain Capital Private Equity's Investment Strategy

Bain Capital Private Equity pioneered the value-added investment approach. We partner with management teams to help build and grow great companies. Our success is built on a collaborative approach that harnesses the power of those great teams to generate the best ideas and strategies.

Our global team, which now operates in eleven offices on four continents, has made more than 1,000 primary and add-on investments that have generated consistently strong returns. Collectively, about 10 percent of our private equity funds' commitments come from our professionals, far in excess of industry convention and reflective of both our strong principal investor mentality and confidence in our ability to generate industry-leading returns.

Bain Capital Private Equity's expected holding period for an investment is four to seven years. Each of its funds is formed for a period of approximately ten years, which allows Bain Capital Private Equity to make considered, long-term investments with a view towards true improvement and value creation in its portfolio companies.
